CAREER OBJECTIVE

Final-year Electronics and Communication Engineering student with a strong foundation in **programming, web development, IoT, electronics, and automation**, along with hands-on experience in developing practical technology-based projects. Full-Stack Developer with a keen interest in building **responsive, scalable, and user-focused web applications**. Skilled in **problem-solving, analytical thinking, technical communication, debugging**, and understanding **project requirements**. Eager to apply knowledge of **full-stack development, software engineering, and programming** to build effective **software solutions** and contribute to organizational growth.

EDUCATION

Dayananda Sagar College of Engineering **2023 – Present**
*BE in Electronics and Communication - **CGPA - 6.5*** *Bengaluru , Karnataka*

MJ Activity Senior Secondary School **2021**
*Class XII (12th) - **Percentage - 79.2%*** *Utraula , UP*

MJ Activity Senior Secondary School **2019**
*Class X (10th) - **Percentage - 67%*** *Utraula , UP*

PROJECTS

VoltMap — Smart EV Charging Platform | HTML5, CSS3 ,Javascript, Node.js, Express.js, REST API

- Developed VoltMap — Smart EV Charging Platform using **HTML, CSS, JavaScript, Node.js, Express.js, Socket.IO, Leaflet, OpenStreetMap, and Razorpay**, enabling users to discover nearby EV charging stations, track **real-time charger availability**, search and filter stations, book charging slots, and make online payments through **REST APIs, authentication, geolocation, booking management, and JSON**-based data persistence.

AR Based Indoor Navigation System | Unity, ARCore, QR Code Scanning, A* Algorithm **04 2026**

- Developed an **Augmented Reality (AR)** based **Indoor Navigation System** that guides users from a source to a destination inside buildings using **real-time AR directional arrows**, **QR code-based localization**, and the **A* shortest path algorithm** for accurate route calculation.

Inventory Management | React.js, Node.js, Express.js, MongoDB, REST API **05 2025**

- Developed a full-stack **Inventory Management System** using **React.js, Node.js, Express.js, MongoDB, and REST APIs** to add, update, delete, and manage product records while tracking stock information through an organized and user-friendly interface.

Designing My Portfolio | HTML5, CSS3, JavaScript, Responsive Web Design **08 2025**

- Designed and developed a responsive personal portfolio website to showcase my **skills, projects, education, and achievements** with a modern and user-friendly interface.

To Do List | HTML5, CSS3, JavaScript **08 2025**

- Built a responsive **To Do List application** to add, edit, delete, and manage daily tasks with a simple and interactive user-friendly interface.

TECHNICAL SKILLS

Core Concepts: Data Structures and Algorithms, Object-Oriented Programming (OOP), DBMS
Languages: Embedded C, C++, React.js, Node.js, SQL
Developer Tools: VS Code, Keil uVision, MATLAB, Arduino IDE, Git
Technologies:ESP32 Microcontrollers (ARM, AVR), Arduino, Linux, Circuit Design, IoT

CERTIFICATIONS/ACHIEVEMENTS

- Electronics/Coding Certification
- Microsoft Azure Certification
- MATLAB Onramp (MathWorks)
- Solved 100+ DSA problems
